Applicant's Response

1. In Applicant's Response dated 10/23/2008, Applicant amendments to the claims and provides corresponding arguments that are persuasive.

All objections and rejections previously set forth are withdrawn.

Allowable Subject Matter

2. Claims 1-5, 7-20, 22-35 are allowed.
3. The following is an examiner's statement of reasons for allowance

Claims 1, 8, 15, 19, 23, 29 and 32

The closest prior art of Benhase et al, Therrien et al, and Newman teach three mechanisms for displaying data attributes in a table that represents the physical storage of a given device. Benhase shows two file systems (Server A and Server B) and the resources connected to the device, within each server is a file system (ISS and the volumes). Therrien also shows a table displaying data attributes that reflect the contents of the storage devices on the EAST, WEST devices. Newman shows a tree table where data can be represented in the table with a given label and where the paths or nodes of a tree are directly linked to the table data. However, none of the prior art suggest or teach the stated and claimed advantage of the present invention of showing in a tree table with the allocated storage to both a user and a group on the second level node in a tree for each file system along with the third level node showing the actual consumer in the tree and corresponding data in the table. Further, the prior art does not suggest or teach the toggling between a tree-table view and a table view and simultaneously displaying the data for two different file systems, as recited in the claims. For example, Benhase specifically states the information is available in one window (See Para 49 and 59), as compared to the toggling in the present claim to provide another view or window and where Benhase specifically states displaying data related to the copy operations being performed on a given device. Nothing in Benhase suggests displaying the allocated storage capacity for both a user and a group on

Art Unit: 2179

each file system. Nothing in Therrien or Newman suggests the tree table can be toggled to show the users and group allocated storage in either a tree or table on the display. Therefore, the claims are allowed over the prior art.

Claims 2-5, 7, 9-14, 16-18, 20, 22, 24-28, 30-31, and 33-35

These claims are dependent upon Claims 1, 8, 15, 19, 23, 29 and 32 and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven B. Theriault whose telephone number is (571) 272-5867. The examiner can normally be reached on M-F 7:30 - 4:00 PM.
